SECTION 1: REPORT CONTENT

Title/Subject:	Ministerial Strategic Group Improvement Objectives March 2019
Meeting:	Integration Joint Board
Date:	29 th May 2019
Submitted By:	Ananda Allan
Action:	For Discussion and Noting

1. Introduction

- 1.1 The Ministerial Strategic Group for Health and Community Care (MSG) has overall responsibility for policy matters that cross the local government / NHS Scotland interface. This group is a key forum for taking forward the Convention of Scottish Local Authorities (COSLA) and the Scottish Government's joint political leadership of health and social care integration.
- 1.2 Integration Authorities have been asked to set trajectories against a suite of integration indicators and report regular (quarterly) progress to the MSG.
- 1.3 Trajectories for these indicators were agreed by the Integration Joint Board (IJB) in March 2017. These trajectories took into account past performance, National Delivery Plan targets and knowledge of local performance in the target areas. Dumfries and Galloway Health and Social Care Partnership (DGHSCP) is asked to submit the information to MSG using a reporting template provided by them.
- 1.4 The IJB agreed new trajectories for the integration indicators for 2019/20 in January 2019.
- 1.5 The Source team at the Information and Statistics Division (ISD) of National Services Scotland (NSS) provide a spreadsheet of data for the 6 key areas on a monthly basis. Not all indicators are updated monthly.
- 1.6 This MSG performance update template is based on integration performance indicators v1.15, released by ISD in March 2019 containing SMR01 data up to October 2018.
- 1.7 Appendix 1 provides information against Scottish Government targets.

2. Recommendations

2.1 The Integration Joint Board is asked to:

- **Note performance against the MSG suite of indicators at March 2019.**

3. Main Body of the Report

- 3.1 **Unplanned admissions** - 12 month rolling average is 1,483 admissions. This is 5.9% above the desired trajectory of 1,400 for Oct 18.
- 3.2 **Unplanned bed days** - 12 month rolling average is 11,263 bed days. This is 0.3% above desired trajectory of 11,230 for Oct 18.
- 3.3 **Emergency Department attendances** - 12 month rolling average is 3,695 attendances. This is 4.4% below desired trajectory of 3,865.
- 3.4 **Delayed discharge bed days** - 12 month rolling average is 1,171 bed days. This is 17.1% above the desired stretch trajectory of 1,000 for Dec 18. (But 1.2% below the original desired trajectory of 1,186 for Dec 18)
- 3.5 **Last 6 months of life** - people spent 8.3% (2017/18p) of their last 6 months of life in an acute hospital setting, which is a reduction from the previous year (9.1%).
- 3.6 **Balance of Care** - Time spent in acute hospital has risen from 446 to 450 person-years since the previous year, while time spent in cottage hospital has fallen from 75 to 69. Overall figures show that total time spent in all institutional settings has reduced modestly.

4. Conclusions

- 4.1 The IJB is asked to note and discuss the Ministerial Strategic Group Improvement Objectives March 2019 report.
- 4.2 Submitting this report fulfils the reporting requirements of the IJB to the Ministerial Strategic Group.

SECTION 2: COMPLIANCE WITH GOVERNANCE STANDARDS

5. Resource Implications

5.1 No resource implications are identified within this Report.

6. Impact on Integration Joint Board Outcomes, Priorities and Policy

6.1 The Integration Joint Board is required to have oversight of operational delivery of delegated services.

7. Legal & Risk Implications

7.1 Regular performance reporting by the Integration Joint Board is a legislative requirement.

8. Consultation

8.1 The Chair, Vice Chair, Chief Officer and Governance Officer have discussed the content of this paper at the IJB pre meet.

9. Equality and Human Rights Impact Assessment

9.1 An Impact Assessment is not required at this time.

10. Glossary

COSLA	Convention of Scottish Local Authorities
DGHSCP	Dumfries and Galloway Health and Social Care Partnership
IJB	Integration Joint Board
ISD	Information and Statistics Division
MSG	Ministerial Strategic Group for Health and Community Care
NHS	National Health Service
NSS	National Services Scotland
SMR01	Scottish Morbidity Recording Scheme 01
Person-year	A person year is the total amount of time 1 person has in 1 year. If someone has a home care support package all year round, this would equal 1 full person year of being supported in the community. If a person has a hospital admission for 1 month, this would equal one twelfth of a person year spent in an institutional setting.
