

Alcohol and Drug Partnership (ADP) Annual Reporting Survey: 2022/23

This survey is designed to collect information from all ADPs across Scotland on a range of aspects relating to the delivery of the National Mission **during the financial year 2022/23**. This will not reflect the totality of your work but will cover those areas where you do not already report progress nationally through other means.

The survey is primarily composed of single option and multiple-choice questions, but we want to emphasise that the options provided are for ease of completion and it is not expected that every ADP will have all of these in place. We have also included open text questions where you can share more detail.

We do not expect you to go out to services in order to respond to questions relating to activities undertaken by them in your area. Where questions refer to service level activities, we are interested in the extent to which you are aware of these at an ADP level.

We are aware of some element of duplication with regards to questions relating to MAT Standards and services for children and young people. To mitigate this, we've reviewed the relevant questions in this survey and determined the ones that absolutely need to be included in order to evidence progress against the national mission in the long-term. While some of the data we are now asking for may appear to have been supplied through other means, this was not in a form that allows for consistently tracking change over time.

The data collected will be used to better understand the challenges and opportunities at the local level and the findings will be used to help inform the following:

- The monitoring of the National Mission;
- The work of a number of national groups including the Whole Family Approach Group, the Public Health Surveillance Group and the Residential Rehabilitation Working Group, amongst others; and
- The priority areas of work for national organisations which support local delivery.

The data will be analysed and findings will be published at an aggregate level as [Official Statistics](#) on the Scottish Government website. All data will be shared with Public Health Scotland to inform drug and alcohol policy monitoring and evaluation, and excerpts and/or summary data may be used in published reports. It should also be noted that the data provided will be available on request under freedom of information regulations and so we would encourage you to publish your return.

The deadline for returns is Tuesday 27th June 2023. Your submission should be signed off by the ADP and the IJB, with confirmation of this required at the end of the questionnaire. We are aware that there is variation in the timings of IJB meetings so please let us know if this will be an issue.

If you require clarification on any areas of the survey or would like any more information, please do not hesitate to get in touch by email at substanceuseanalyticalteam@gov.scot.
